SUMMARY

Frontend Engineer with 4+ years of experience developing and maintaining scalable web, mobile, and desktop applications using React.js, React Native, TypeScript, and Tauri. Experienced in building real-time trading platforms, designing frontend architectures, leading development teams, and delivering enterprise-grade solutions across banking, telecommunications, agriculture, and e-commerce sectors. Skilled in improving application performance, collaborating with cross-functional teams, and driving products from concept to production.

WORK EXPERIENCES

PT. Maybank Sekuritas Indonesia

April 2025 – Present

Full – Time - Frontend Engineer

- Developed and maintained the Maybank Trade Mobile Application using React Native, TypeScript, Redux, WebSocket, and Fastlane, delivering real-time trading experiences for capital market users.
- Managed Android and iOS application releases, including deployment, versioning, and distribution through Google Play Store and Apple App Store.
- Successfully implemented Two-Factor Authentication (2FA) using OTP verification, enhancing account security and user authentication processes. Improved the Watchlist feature by refining the user interface, introducing animations, and optimizing performance for a better user experience.
- Led a major refactoring initiative for the Maybank Trade Mobile Application, redesigning the project structure and WebSocket architecture to improve code maintainability, scalability, and the efficiency of real-time data processing.
- Architected and led the frontend team in building the Maybank Trade Desktop Application from scratch using Tauri v2, React.js, TypeScript, Zustand, and WebSocket. Designed a scalable frontend architecture and established development standards to efficiently handle high-frequency real-time market data while ensuring application performance, responsiveness, and maintainability.

PT. CIMB Niaga Tbk ID

October 2024 – April 2025

Full – Time - Frontend Developer

- Developed and maintained the Arjuna by CIMB Niaga using TypeScript (ReactJS), implementing Tailwind CSS for Front Office styling and SCSS for Back Office.
- Successfully developed two new features/modules: SLIK for Front Office and TRS Letter for Back Office, enhancing system functionality and user experience.
- Top Sprinter in the February sprint period for outstanding performance, demonstrating strong problem-solving skills and efficient project delivery.

PT. Rastek Inovasi Digital

Mar 2024 – October 2024

Full – Time - Mobile Developer and Frontend Developer

- Developed and maintained the IDMAI Mobile Survey Apps for BAPPENAS using Javascript (React Native), Facilitating its use by farmers across Indonesia to enhance agricultural productivity and data collection.
- Developed and maintained the M Bravo Mobile Apps for Mitra Telkom using Javascript (React Native), create offline mode feature to ensure continuous functionality in areas with limited connectivity.
- Developed and maintained the Squat Bravo Web Apps for Mitra Telkom using Javascript (ReactJS), including the creation of master data features and integration with master data APIs
- Developed and maintained the GSD Web Apps for Telkom Property using JavaScript (ReactJS), including the creation of SIMA (Asset Management Information System) features and integration with SIMA APIs. Additionally, optimized large datasets to ensure the web app's performance remained efficient and responsive.
- Collaborated seamlessly with Back-End Developers, UI/UX Designers, Computer Vision experts, and the Project Manager to innovate and develop new features, integrating cutting-edge Machine Learning technology to improve functionality.
- Conducted thorough code evaluations and optimizations for the IDMAI and M Bravo applications, achieving a significant 30% improvement in performance. This enhancement resulted in a better user experience and increased operational efficiency.

PT. Halal Pedia Indonesia

Aug 2023 – November 2023

Full – Time - Mobile Developer

- Performing routine maintenance to ensure that the Halalpedia application runs smoothly and optimally using Javascript (React Native).
- Contribute to developing 5 new features in the Halalpedia application, including the Notification List feature, Inbox feature, Giving Rating to Purchased Items feature, Rating History feature, and Product Discussion feature.
- Conducting regular updates on the Google Play Store and Apple App Store to ensure that users always have access to the latest version with improvements and new features.
- Collaborated with the Quality Assurance, Back-End, and Marketing teams to ensure high-quality application updates and develop new features that enhance functionality and user experience.

PT. Komunita Ambis Nusantara

Feb 2022 – Aug 2023

Full – Time - Mobile Developer And Frontend Developer

- Mentored 4 team internship members. assisting in enhancing their skills, such as teaching UI slicing, API consumption, and providing help when they encounter challenges.
- Responsible for creating, developing, and launching the Android based Schoolfess mobile application using Javascript (React Native).
- Responsible for the development of the "Schoolfess Indonesia" website, using PHP (Laravel), which includes UI slicing, API consumption, and the addition of new features. Contributed to enhancing UX and user engagement.
- Responsible for the development of the "SBM Indonesia" website, using Javascript (ReactJS), which includes UI slicing, API consumption, updating functionalities, and adding new features to meet user needs.
- Contributed to a 450+ user increase in new downloads within a week after the launch of the Schoolfess application.
- Collaborated with the UI/UX Designer, Back-End Developer, Quality Assurance, Marketing, and CTO to develop new features in the Schoolfess App, ensuring alignment with functionality and business processes.

PT. Bayer Indonesia

Apr 2020 – Apr 2021

Internship – Fullstack Web Developer

- Created and developed a web application, the "Employee Performance Management Information System," to facilitate the employee performance assessment process at the West Java branch office.
- Utilized PHP programming language and leveraged the Laravel framework.
- Built a responsive and user-friendly User Interface for the "Employee Performance Management Information System" web application.
- Responsible for deploying the system on the provided hosting, ensuring smooth application operation.

EDUCATION

UNIVERSITAS KOMPUTER INDONESIA

Bachelor of Computer Science

Bandung

2018 – 2022

- Major in Informatics Engineering, 3.15 / 4.00

TECHNICAL SKILLS

- Programming Languages: PHP, Javascript, TypeScript
- Framework: PHP (Laravel), Javascript or TypeScript (React Js, React Native, NodeJS, ExpressJS, NextJs, AngularJS, Tauri), CSS (Tailwind, Bootstrap)
- Database: MySQL, MongoDB, PostgreSQL
- Developer Tools: Gitlab, GitHub, BitBucket, Postman, ArgoCD
- Languages : Bahasa Indonesia (native), English (intermediate)
- Other Relevant Skills: Responsive Slicing UI, REST API, Debugging, Figma, Atomic Design.

CERTIFICATIONS

- Badan Nasional Sertifikasi Profesi Junior Web Developer (BNSP)
- CCNAv7: Introduction to Networks (CISCO)
